

Press Release

NXVISION MANAGING DIRECTOR PRESENTS AT THE "FUTURE OF BROADCASTING".

2009 A BREAKTHROUGH YEAR FOR PLACESHIFTING?.

DUNFERMLINE, JUNE 30TH, 2009: NXVision Ltd. Managing director ,Tony Combe, has been asked to present at the prestigious IEA & Marketforce event "The Future of Broadcasting".

The topic for the presentation is "2009 a breakthrough year for placeshifting?" and Tony will share the stand with senior executives from the BBC, ITV, BSkyB, Five, Channel4 and others.

NXVision has been creating placeshifting and sideloaded applications for Set-Top Boxes since 2006, and as such is ideally placed to answer the question about 2009 being a breakthrough year.

"I am honoured to be invited to present at this event, and look forward to the discussions over the whole 2 days. NXVision believes that traditional broadcasters must adapt and adopt new technology in order to better compete in today's and tomorrow's markets" said Tony.

About NXVision Ltd.

NXVision Ltd is the leading provider of secure Placeshifting solutions to its business partners. The NXVision secure Placeshifting system enables users to access their set-top box content (live and pre-recorded) anywhere, in-home or around the world. The system takes broadcast quality TV content and modifies it for display on portable devices and then sends it to an authorised connected device. The system is point to point, allowing full dynamic control of quality of service, enabling the service to be easily scaled without the need for new broadcast infrastructure. The content is fully protected as it uses the existing Conditional Access (CA) in the STB, and mobile DRM where required.

NXVision Ltd. is located in Dunfermline, Scotland and was founded in August 2006 to take advantage of its unique place-shifting IP. NXVision provides and manages complete systems and has established itself as the leading enabler of end-to-end secure digital placeshifting and sideloaded solutions for its industry partners.
